

P50XHA30

50" colour plasma display monitor

Award-winning technology, working for you
Fujitsu General Limited is proud to present the new 50" plasma display monitor, which features a brand new cabinet design to perfectly match the home theatre environment. Equipped with Fujitsu General Limited's exclusive AVM (Advanced Video Movement) Full Digital Video Processor to achieve the industry's highest picture quality, it achieves incredibly high brightness and high definition by incorporating our industry-leading technology into the plasma display. Combining the "Fine Mode" feature, which enables you to create cinema quality pictures with a touch of a button, with the built-in equipped D-class, 1-bit, delta-sigma spectrum digital audio amplifier, you can easily experience the image and sound quality of a movie theatre in your own home. With the inclusion of a wide variety of inputs, such as SCART and component, the new plasma display easily meets the demands of today's, and tomorrow's, various image sources.

FUJITSU

For a world without limits.

P50XHA30
